

ACRILIM: AC1-1A AC2-1G AC3-1G

Cleaning and non-stick liquid, non-aggressive, universal. Slow but total evaporation, leaves no trace. Industrial product, for professional use. High cleaning power. Does not damage the material being cleaned.

Field of application:

- Particularly suitable for cleaning the remains of glue on acrylic edges and gloss surfaces. It can be applied manually or by using a spray device found on some automatic edgebanders, at the end of the machine before the buffing pads.
- Suitable for cleaning the remains of glue in carpentry and cabinetmaking jobs. For cleaning and recovering sandpaper.
- Suitable for cleaning metal. Does not damage metal components.
- Suitable for cleaning electrical elements and components.
- Can be applied as a non-stick product using the spray device found on some automatic edgebanders, at the start of the machine before the profile scraper or in its absence before the gluing area.

Technical details:

- It comes in an Aerosol of 520cc in a box of 6 units, or a Bottle of 5 litres in a box of 4 units, or in bottles of 25 litres.
- We have a safety sheet.

Instructions for use:

- Spray: Spray at a distance of 30 cm from the surface to clean. Wait a few seconds for the remains of the glue and dirt to soften and then remove them by rubbing with a clean cloth. After a few seconds the surface will be dry and clean.
- Drum: Transfer the liquid from the drum to a spray bottle. Spray at a distance of 30 cm from the surface to clean. Continuously rub the remains of glue and dirt with a clean cloth, and once the dirt has been removed leave the product to evaporate. After a few seconds the surface will be dry and clean.

Safety Advice:

- Keep the place of application well ventilated, do not inhale the vapours.
